FAILURE MECHANISMS & MODES TRAINING PROGRAMME

This is to certify that

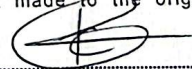

SIVE MAGAZI

Successfully completed the
Anglo American Asset Strategy & Reliability
Failure Mechanisms & Modes course

21 - 29 May 2019

LEITH HITCHCOCK - FACILITATOR
Lead - Reliability Engineer Defect Elimination
Asset Strategy & Reliability, Anglo American

I certify that this document is a true reproduction (copy) of the original document which was handed to me for authentication. I further certify that from my observations, an amendment or a change was not made to the original document.	
	
Force Number: 726796-9	Rank: Cst
Name In Print: Setlhalefo KOJ	

Learning Outcomes Achieved

Section 1: Introduction

- Describe the objectives, context and purpose of the training program
- Discuss 'What Good Looks Like' for Defect Elimination and Reliability
- Explain the general management and investigation process used in root cause analysis

Section 2: Investigation Techniques. Participant is able to:

- Explain the sequence of events during the investigation process
- Describe the application of difference analysis during evidence collection
- Define the difference between mechanisms, modes, initiators and influences
- Use investigation kit tools effectively

Section 3: Metallurgy. Participant is able to:

- Define the structure and composition of metals and alloys
- Describe steel microstructures and alloying principles
- Explain mechanical properties that influence metal deformation
- Discuss the various metal treatments and their applications and limitations
- Describe various metal testing methods

Section 4: Fracture Failure. Participant is able to:

- Define the different fracture types and describe their differences
- Explain the influence of metal composition, micro structure and crystal structure on the various fracture types
- Illustrate and explain fracture stresses and propagation
- Perform an inspection and identify the various fracture types

Section 5: Corrosion Failure. Participant is able to:

- Define the different corrosion types and describe their differences
- Explain the influence of metal composition, micro structure and properties on the various corrosion failure types
- Illustrate and explain corrosion mechanisms and influences
- Perform an inspection and identify the various corrosion types

Section 6: Wear Failure. Participant is able to:

- Define the different wear failure types and describe their differences
- Explain the influence of metal composition, micro structure and properties on the various wear failure types
- Illustrate and explain wear mechanisms and influences
- Perform an inspection and identify the various wear failure types

Section 7: Lubricant failure. Participant is able to:

- List the three components of a lubricant
- Describe the role of a lubricant
- Define the different lubricant failure mechanisms
- Identify the different lubricant failure mechanisms and perform further research back at their workplace

I certify that this document is a true reproduction (copy) of the original document which was handed to me for authentication. I further certify that from my observations, an amendment or a change was not made to the original document.
